AVAILABLE AT THIS PRACTICE

# Colon screening starts at home.

A take-home kit for adults 45 to 75 at average risk. It is a first step, not a replacement for colonoscopy — and if it comes back positive you will still need one.

- Collected at home, posted back prepaid
- Hand it in at the front desk if you would rather
- A positive result means a colonoscopy is needed

Cancer Detection Stool

## Ask at the front desk.

Your clinician can tell you whether it is right for you.
